

Bake & Broil Elements

- Manufactured on the same production lines as the OEM parts.
- Meet or exceed OEM specifications and are UL/CSA approved.
- The outside sheath is made of Incoloy™ a very high temperature nickel stainless alloy.
- The elements are sealed with a high temperature liquid silicone compound straight out of the annealing oven, to prevent any moisture in the element.

Tech Tip:

After Installing a Bake, Broil or Surface Element the element should run at full temperature for a minimum of 5 minutes. This will drive out any moisture that may have been absorbed by the element during shipping and storage.

Part numbers and illustrations are intended solely for identification, Items offered for sale are not represented to be manufactured by the company that built the original equipment manufacturer, actual product may vary from illustration.

Tech Tip:

After installing a Bake, Broil or Surface Element the element should run at full temperature for a minimum of 5 minutes. This will drive out any moisture that may have been absorbed by the element during shipping and storage.

Surface Elements

- Manufactured on the same production lines as the OEM parts.
- Meet or exceed OEM specifications and are UL/CSA approved.
- The outside sheath is made of Incoloy™ a very high temperature nickel stainless alloy.
- The support (spider) is high temperature stainless steel.

Receptacle

RR117 Universal Surface Element Receptacle

- Replaces over 200 part numbers
- Rated to 302 F (150 C)

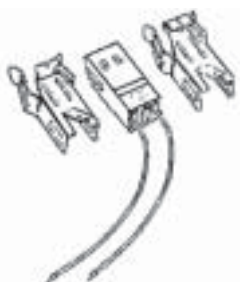

Kit Includes:

- Vertical & Horizontal Mounting Bracket
- Wire nuts
- Heat Shrink
- Block
- Terminals w/ High temp wire leads

Current Service Pack Replacement Numbers:

Amana 0089336, Frigidaire 5303935058, 5303912666, 5301167733, GE WB17X210, Maytag 12001673, 12001676, Whirlpool 330031.

Note: This is a plastic receptacle. For safety, replace ceramic receptacles with ceramic type.

SGR Series Range Igniters

Utilizing a spiral design, SUPCO's full line of igniters have greater physical strength and longer life. Including mounting hardware, where necessary, direct replacement of original equipment parts is easy (Including round and flat original parts). Choose the igniter for your application. See page 107 for Dryer Igniters and pages 46-49 for Furnace Igniters.

Range igniters are offered in round and flat style to accommodate the maximum number of OEM applications. The basis for each style utilizes high density silicone carbide for greater physical strength. See Cross Reference table for OEM matches.

SGR400 Universal Round Range Igniter Kit *New!*

Replaces ALL Round SGR400 Series igniters, long block or short block.

- Easy to use
- Mounts exactly like the original
- Higher call completion rate
- Supersedes the SGR405 and SGR413

SGR403

SGR Series Direct Replacement Round Range Igniters

- Highest density silicone carbide –greater physical strength
- Double helix spiral design – requires less current to light
- Easy installation – no modifications or adapters necessary

SUPCO Part No.	GEM Part No.	Igniter* Length
SGR401	GR401	6 ¼"
SGR402	GR402	5 ¼"
SGR403	GR403/GR423	3 ½"
SGR404	GR404	3 ½"
SGR405	GR405	3 ½"
SGR413	GR413	3 ½"

*Approximate

SGR414 Universal Flat Range Igniter Kit *New!*

Replaces ALL Flat SGR400 Series igniters, long or short block.

- Easy to use
- Mounts exactly like the original
- Higher call completion rate

SGR412

SGR Series Direct Replacement Flat Range Igniters

- Superior spiral design
- Shock mount design
- Direct Replacement for old-style flat igniters

SUPCO Part No.	GEM Part No.	Igniter* Length
SGR407	GR407	7 ½"
SGR408	GR408	8 29/32"
SGR409	GR409	5 17/32"
SGR410	GR410	6 7/32"
SGR411	GR411	6 9/32"
SGR412	GR412	4 ½"

*Approximate

Range Igniter OEM Cross Reference on pages 127-129.

Ignitor Facts and Fiction

Fact:	SUPCO's Igniters are made from high density silicon carbide. They are fragile and must be treated with care during installation.
Fiction:	Handling and igniter with bare hands will cause premature failure.
Fact:	Premature failure of an igniter can be caused by excess vibration, incorrect voltage or improper installation.
Fiction:	Round igniter designs cannot be used to replace flat igniters.
Fact:	By using proper mounting hardware, a round igniter can be used in place of an original flat igniter.
Fiction:	If the replacement igniter looks the same as the original, it will work in the application.
Fact:	Igniters differ in their ability to handle current (amps) and each is designed for a specific OEM application. Consult the cross reference information in this product sheet to identify the correct replacement.
Fiction:	Testing for a good igniter is done by measuring its Resistance (Ohms).
Fact:	The test of an igniter is done by measuring the current draw (amps) of the ignition circuit.
Fiction:	A visual inspection of an igniter will identify whether it is operable.
Fact:	Hairline cracks cannot be seen, and will cause improper operation of the igniter. It is recommended to use a current (amp) test.

Oven Racks

Direct and Universal Oven Racks

- Manufactured from heavy duty steel rods with a welded frame construction.
- These nickel plated racks are an affordable solution for replacing old racks.
- Heat tested to 1200°F to insure the highest quality plating.
- Replaces Regular, Self-Cleaning Gas or Electric.
- Replacement part numbers by brand or measurements for universal applications.
- Replaces many Amana, Maytag, Frigidaire, GE, Welbilt, and Whirlpool racks.

GEM P/N	Replacement For	Width	Depth	Support

Oven Door Gaskets

Cross Linked Polyethylene Appliance Wire

- General purpose plastic coated wire for appliance repair .
- Tinned copper conductor rated to 600 Volts
- Good for applications up to 125° C / 257° F

SUPCO Part No.	Description	Ampacity* @ 40°C	Max Wattage @ 240/120 Volts
RP0514P	5 ft. 12 Ga. Triplex, 125°C wire, (Red, Black, White)	15 Amps	3.6 / 1.8 KW
RP0512P	5 ft. 14 Ga. Triplex, 125°C wire, (Red, Black, White)	20 Amps	4.8 / 2.4 KW
RP2514P	25 ft. 12 Ga. Triplex 125°C wire, (Red, Black, White)	15 Amps	3.6 / 1.8 KW
RP2512P	25 ft. 14 Ga. Triplex 125°C wire, (Red, Black, White)	20 Amps	4.8 / 2.4 KW
RP5014P	50 ft. 12 Ga. Triplex 125°C wire, (Red, Black, White)	15 Amps	3.6 / 1.8 KW
RP5012P	50 ft. 14 Ga. Triplex 125°C wire, (Red, Black, White)	20 Amps	4.8 / 2.4 KW

* Check NEC Manual for multiple conductor and ambient temperature derating factors.

Freezer to Range Sil-A-Blend®

Introducing Sil-A-Blend®, a new high temperature wiring solution. Sil-A-Blend® is the same high temperature wire that you have been using,

1. With a plated copper conductor
2. Silicone high temperature insulation
3. Embedded glass braided cover for abrasion resistance

Here is the new twist.

4. -A coat of colored silicone over the top of the glass braid
-Triplexed in Red / White / Black for easy application

- No more itching • Easier to strip • Replaces plastic, rubber and glass braid wire (up to 200°C / 392°F)
- Colors won't fade • Rated to 600 Volts

Great for HVAC, Laundry, Ranges, same low prices as the old glass braided wire. Special Projects: Ask about our 500 foot spools.

SUPCO Part No.	Description	Ampacity* @ 40°C	Max Wattage @ 240/120 Volts
RP0512G	5 ft. 12 Ga. Triplex Sil-A-Blend® 200°C wire, (Red, Black, White)	45 amps	10 / 5 KW

Commercial Freezers to Industrial Furnaces DuraFlex®

Introducing DuraFlex®, Very high temperature wire. Rated to 450°C / 842°F for extreme temperature applications, used in furnaces, smelters, commercial cooking, self cleaning ranges and industrial applications.

Don't be fooled by imitations. This is the Original "Nickel Hinge Wire".

- Constructed of a copper base wire coated with nickel to 27% of the total conductor (not the 2% imitator)
- Heavy Mica insulation covered with a Glass Braid wrapper for abrasion resistance.
- Then finished with a Teflon® penetrant to reduce itching and aid in stripping.
- Need a lot of wire, ask about 500 foot spools.
- Rated to 600 Volts
